HI-Visibility Reflective Safety Jackets

Scotchlite™
Reflective Material

Description

3M™ Scotchlite™ Reflective Material – Fabrics are designed for use on safety garments and in athletic and casual wear. When properly used, Scotchlite reflective material helps enhance the visibility of the wearer in nighttime or low-light conditions when illuminated by a light source, such as headlights, by returning the light back toward the original source and reaching the automobile driver's eye. Fluorescent color fabrics are also available to enhance daytime and low light visibility. Scotchlite reflective material – fabrics are composed of wide angle, exposed retroreflective lenses bonded to a durable cloth backing and are available in home wash and industrial wash instructions. Flame resistant fabrics are also available. The fabric backing on some products is printed with 3M trademarks for easy product identification.

3M™ Reflective Fabric 8906	
Model	3M 8906 Silver Fabric Trim
Width	50.8 mm (2.0 inch)
Length	200 meter (218.7 yd.) / Roll
Daytime Colour	Silver
Reflected Colour	White
Domestic Wash /Dry Cycles	60°C (140°F) x 30 cycles
Initial Average RA4	500
Minimum RA5	330
Fabric Backing	100% polyester printed with 3M trademarks

3M™ Reflective Fabric 2925	
Model	3M 2925 Silver Fabric Trim
Width	50.8 mm (2.0 inch)
Length	200 meter (218.7 yd.) / Roll
Daytime Colour	Grey
Reflected Colour	White
Domestic Wash /Dry Cycles	60°C (140°F) x 25 cycles
Initial Average RA4	500
Minimum RA5	330
Fabric Backing	100% polyester printed with 3M trademarks
